

Quality & Environmental Policy Statement

Trafalgar Scientific Ltd is an environmentally conscious organisation and as such we acknowledge the potential environmental impact that our operations may have on the environment. Trafalgar Scientific Ltd aims to provide a “one-stop shop” for laboratory equipment, consumables and services to its customers within the Industrial Microbiology Sector, as well as manufacturing and other scientific/health care industries, which fully satisfies all their requirements and any legal and statutory conditions. We also aim to protect the environment by reducing our carbon footprint and preventing pollution. We aim to fulfil the organisations environmental compliance obligations and continually improve the environmental management system to enhance environmental performance.

We operate an Integrated Management System (IMS) which meets the requirements of [ISO 9001](#), [ISO 13485](#), [ISO 14001](#) and [ISO 45001](#).

Our IMS is developed and embraced by everyone in our organisation. Our systems and controls have been developed based on risks and opportunities to our business and to our environmental performance. We operate a system of reviews and communications through meetings, newsletters, and a Sustainability Committee, which helps us to monitor our performance and helps us implement improvements when appropriate, considering feedback from both our employees and our customers and any other relevant stakeholders.

Our mission is summed up as a **QUEST** for Excellence.

Quality – Providing a quality service comes from:

Understanding – Understanding our customer’s needs, and understanding our quality system.

Excellence – Striving for environmental efficiency and excellence in everything we do.

Service – Providing an outstanding service that meets customer needs.

Training – Continually learning and developing.

This policy has been established by top management who fully support its implementation. Top management are responsible for ensuring that it is communicated, understood, implemented, and maintained at all levels within the organisation.
