5.2 Special hazards arising from the substance or mixture

Vapour may create explosive atmosphere.
Hazardous decomposition product(s): Carbon monoxide, Carbon dioxide

5.3 Advice for fire-fighters

Special protective equipment and precautions for fire fighters:

Use self-contained breathing apparatus. Wear fire/flamm resistant/retardant clothing.

Cool affected area quickly with water.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment as required. Provide adequate ventilation to avoid build up of vapours. Keep away from heat and sources of ignition. Avoid contact with eyes. Do not breathe mist/vapours/spray.

6.2 Environmental precautions

Small spillages: No special measures are required.

Large spillages: Do not discharge waste and/or cleaning water via public sewer system. Avoid release to the environment.

6.3 Methods and materials for containment and cleaning up

Allow small spillages to evaporate provided there is adequate ventilation.

Contain and adsorb large spillages onto an inert, non flammable adsorbent carrier. Transfer to a container for disposal or recovery.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice for safe handling: Keep container closed when not in use. Avoid contact with skin and eyes. Do not breathe vapour/spray. Ensure adequate ventilation.

14. TRANSPORT INFORMATION

Transport hazard class(es).

LQ (limited Quantities) refers to small receptacles (typically of the sort that go into the retail distribution chain) which are packed in boxes or on shrink-wrapped trays. The principle behind LQ is that an acceptable level of safety is assured providing the receptacles are in a box or shrink-wrapped tray. Subject to those conditions being met, no other requirements of ADR apply. The containers used for this material do not exceed maximum volume (1 litre) for such limited quantities.
